*when appliances are connected to the ThinQ app

**not all features and functions can be controlled by voice. Voice Recognition Notice: ThinQ ON cannot distinguish between adult and child voices and may respond to voice commands from anyone within range. The account holder is responsible for all use of the device, including use by minors.

***support is limited to troubleshooting from the product owner's manual

Helpful Assistant in the Kitchen

See how ThinQ ON helps with recipes, appliance status, and everyday cooking.

1. Prep

Get real-time alerts from your SKS oven and check status by just asking

2. Pair

Ask for wine pairing to match what you are cooking*

3. Serve

Remotely set the ideal temperature, so your wine is perfectly chilled and ready to serve.*

4. Finish

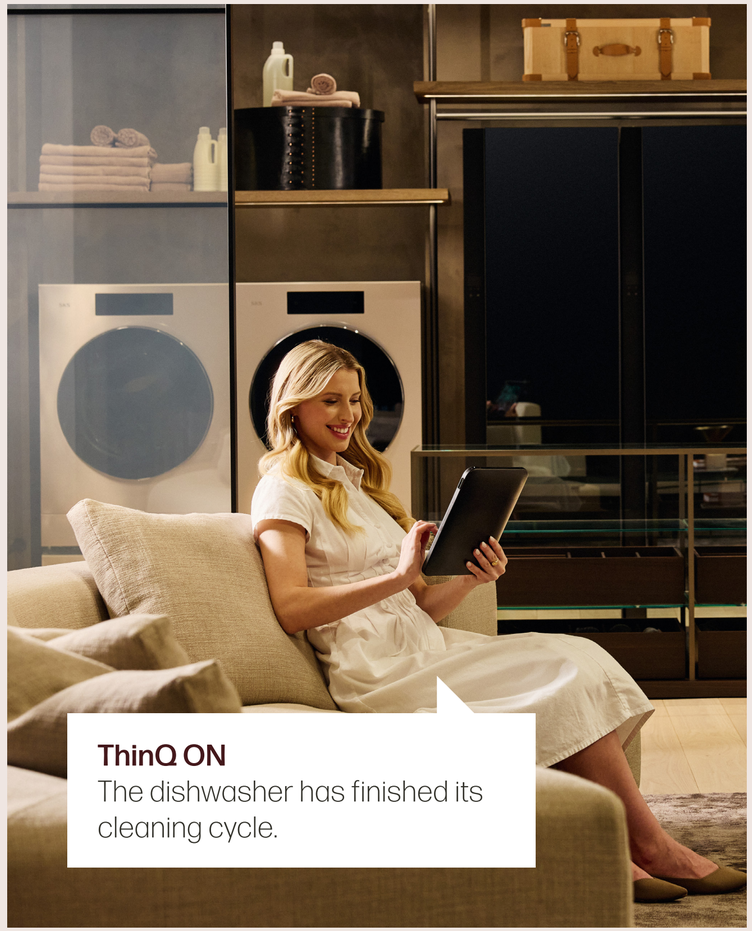

ThinQ ON can recommend the best washing cycle for the dishes

*when used with the Wine Management feature on the ThinQ app

Have a Conversation with AI*

Experience the helpful AI assistant from prepping to hosting to maintaining appliances

*Voice Recognition Notice: ThinQ ON cannot distinguish between adult and child voices and may respond to voice commands from anyone within range. The account holder is responsible for all use of the device, including use by minors.

What Else Can You Do?

ThinQ ON is more than AI for appliances

Casual conversation*

Get cooking tips, preparation ideas, and wine-pairing guidance

Helpful Assistant

Set timer, get news and weather info, and sync your calendar

Create Routines

Combine appliances with lighting, shades, and sensors

Connected Home

Manage compatible third-party devices through one AI hub

“Set a 10-minute timer”

“Should I bring an umbrella tomorrow?”

“Tell me today’s news headlines”

Simulated for illustrative purposes

*Voice Recognition Notice: ThinQ ON cannot distinguish between adult and child voices and may respond to voice commands from anyone within range. The account holder is responsible for all use of the device, including use by minors.

Beyond the Kitchen to the Whole Home

Start in the kitchen and expand as needed

Kitchen

SKS appliances, voice control, status, and routines

Entry

Door lock sensors, camera, and arrival routines

Simulated for illustrative purposes

Living

Lighting, shades, TV, air purification, and comfort scenes

Home Care

Alerts, monitoring, and proactive support across the home

Have a Conversation

Try these voice prompts with ThinQ ON*

- “Hi LG, how much time is left in the upper oven?”
- “Hi LG, what can I make with mushrooms to pair with red wine?”
- “Hi LG, set the wine cellar’s upper zone to 60 degrees.”
- “Hi LG, turn on the light and the fan on the hood.”
- “Hi LG, tell me today’s news headlines.”
- “Hi LG, add dinner event for tomorrow at 7pm.”

Ask the showroom team for a live demo and explore more AI Home experiences.
